TESTIMONIALS

"The SP Air Tools range provides two vital attributes for the Walkinshaw Andretti United Pit Crew. That is the combination of dynamic performance and unwavering consistency to allow every pit stop to be just a little bit easier under pressure. Thanks SP Tools, for giving us the best race-guns in the pit lane!"

Mat Nilsson
Co Team Principal
Walkinshaw Andretti United

"The new SP Tools cordless line were an integral addition to our team, specifically for the brake and calliper changes at the 2018 Bathurst 1000. Our team were proven as the fastest in the pit lane at the event, enabling us to make an intricate change around steaming hot brakes on both cars; and helping us to 2nd at last year's Great Race. This year we're especially motivated to push up onto the top step – and SP Tools will be right there with us, every lap of the race!"

Bruce Stewart
Co Team Principal
Walkinshaw Andretti United

"We're proud to recognise that SP Tools have been partners with Walkinshaw Andretti United for ten years. Our team especially values the quality finish of the tools, with a premium feel in the hand and a durability second to none. Notably the sleek design, smart organisation and transportability of the SP Tool chests assists our mechanics to work as efficiently and effectively in tight surrounds at every Supercars event."

Anthony McDonald
Crew Chief
Walkinshaw Andretti United

"SP Custom series tool kits are a must for the Husqvarna Enduro Race Team with our technician's who have a kit each in the Team truck at the race events and also back at the workshop. They are the perfect size and include everything that we need for our test sessions and race events without being too big and heavy. As we are on the road often, other tools that have been very useful are the 18V SP cordless tools and LED work lights."

Christian Horwood
Husqvarna Enduro Team Manager

"If you want quality and a huge diverse range of equipment, you can't look past SP Tools. I have been using their products for numerous years now both in the workshop, at the race track or in the shed at home. In our sport, every second counts. Using the SP cordless products opens up our teams capabilities to a whole new level, both during the races and in the pits while servicing the Supercar. I feel very honoured to be able to associate myself with such a professional and Australian proud brand."

Todd Hazelwood
Supercar Driver

"SP Tools is a long-term partner of Karting Australia and we are proud to be associated with such a high quality brand. SP Tools has become synonymous with all levels of the sport of karting in Australia. Our naming rights partner for the SP Tools Australian Kart Championship, the highest competition level of our sport, the driving force behind the SP Tools Club Driver Rankings – our grassroots Club participation program and a great supporter of Junior Sprockets and Bring a Mate – our premier introduction to karting programs. In conjunction with their Supercars sponsorship programs, it highlights their support of motorsport at all levels.
At our major events, SP Tools are used by all of our Operational and Technical staff. From impact drivers, cordless drills, spanners and various other speciality tools, they all ensure that our events run smoothly and technical checks can be carried out to the highest of standards. All of the equipment for our Technical staff is carried in a Tech Series Roller Cabinet to guarantee everything arrives to each event in perfect condition."

Kelvin O'Reilly
Chief Executive Officer - Karting Australia.

"SP Tools is an essential part of my life on the farm with heavy duty machinery to traveling the world with my FMX bike. I use every element of the SP Tools range including compressors, roller cabs and torque wrenches."

Jackson Strong
X Game FMX Gold Medallist

"When building performance engines for the toughest conditions, either endurance car racing, drag car, race boats, burnout cars or someone's weekend cruiser, I need the right tools to help complete the job. I need my tools to be as durable as our engines and the only tools we have found to provide us the confidence we can trust is SP Tools. For me to deliver the best we need to use the best. SP Tools is our only choice."

Troy Worsley
Warspeed industries

"The roll cabinet draw layouts and foam organisers work perfectly for Carrera Cup Racing with multiple people accessing the tool box over race weekends. The lock mechanism on the wheels also works great for us in transit moving our equipment around the country."

Todd Gleeson
Wall Racing
Number 1 Mechanic on David wall's Carrera Cup Car #38

"The SPGi2000 is easy enough to use. We simply fuelled it, switched it on and it started with a few pulls of the cord. Subsequent starts were even easier, and we ran a powerboard off the 240V outlet to power laptops and charge batteries each afternoon.
The SPGi2000 is relatively compact and weighs 22kg. We strapped it in the canopy-protected back of a ute for the trip, along with a five-litre fuel can which we didn't use throughout the two weeks.
We say: Simple and easy to use."

QUAD DRIVE

SP Tools patented **QUAD DRIVE** open end offers 4 times the gripping power of a standard Combination spanner by wrapping around the fastener and maximising the contact on the flat sides of the fastener head, not the points.

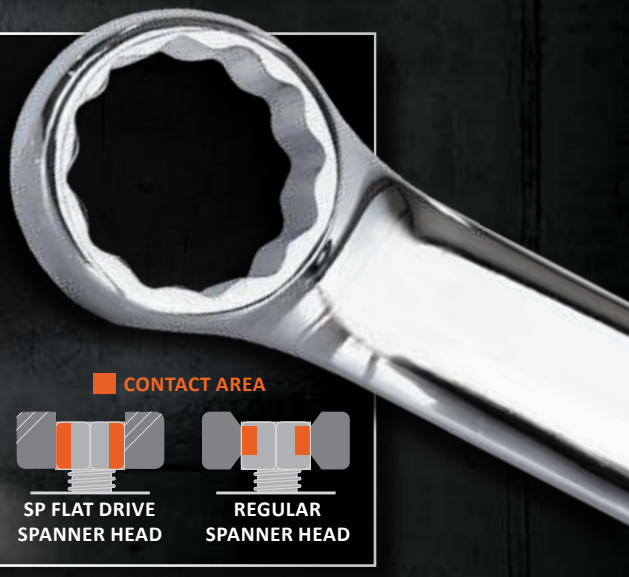

PATENTED

DUAL FLAT DRIVE RING END

SP Tools **RING END** spanners feature dual flat drive ring ends, making them the perfect spanner for getting to and loosening those tricky, hard to reach, often worn fasteners by increasing the contact area with the nut or bolt head. More contact means greater applied torque .

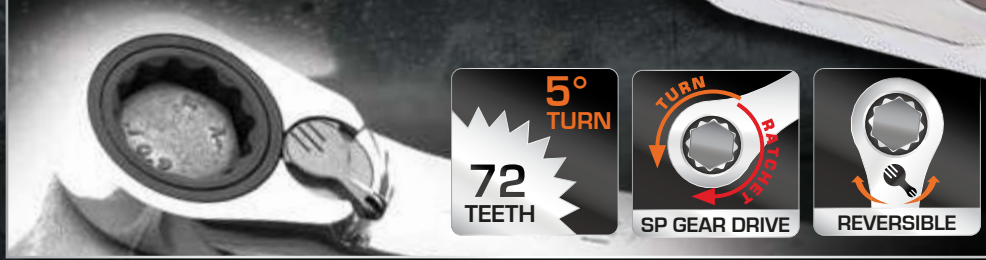

MAXIMUM CONTACT
on the flat sides of the fastener head, not the points.

GEAR DRIVE

SP Tools patented **GEAR DRIVE** spanners are precisely machined with deeper gears for greater torque loading and reliability with 72 teeth that only require 5° of space per turn. The ratchet head allows the spanner to travel without having the need to remove the spanner from the fastener.

SHIFTERS

SP ADJUSTABLE WRENCHES
ONE OF THE WORLDS BEST

SP's shifters (adjustable wrenches) are a must in the professional mechanic's tool box - multiple spanner sizes in one tool. These shifters all feature non-protruding jaw adjustment mechanisms, making these shifters ideal for spaces with limited access. Thicker, heavy duty handles meaning higher applied torque capabilities, making easy work of tough, bedded-in nuts or bolts. All manufactured from high quality Chrome Vanadium (Cr-V) Steel for high strength & durability that meets and exceeds international ANSI & DIN standards.

NUTSERT GUNS

A rivet nut, also known as a blind rivet nut, or rivnut is a one-piece internally threaded and counterbored tubular rivet that can be anchored entirely from one side. It is a kind of threaded insert. Rivet nuts are an ideal replacement for weld nuts because they will not distort base materials, eliminate weld splatter, toxic fumes, and other by-products of the welding process, and can be installed in many different kinds of material including steel, plastic, composites, and fibreglass.

SP69010

NUTSERT GUN - LEVER TYPE

- Sets 3, 4, 5 & 6mm rivet nuts
- Easy change mandrels
- Single or two hand operation
- Light weight cast aluminium construction
- 250mm long

RIVETERS

A rivet is a permanent mechanical fastener. On installation, the rivet is placed in a punched or drilled hole, and the tail is upset, or bucked (i.e., deformed), so that it expands to about 1.5 times the original shaft diameter, holding the rivet in place. A rivet requires a tool that keeps the hat of the rivet firmly pressed against the installation surface while simultaneously pulling the mandrel away from it.
Types of Rivet Guns include:
• Hand • Lever • Lattice • Battery • Pneumatic

LIGHTING

SP'S HIGH PERFORMANCE, QUALITY LIGHTING SOLUTIONS

SP's cordless range of quality work lights are manufactured to the highest standards to suit the needs of the professional and are built to last. The full product range covers a number of lighting needs from small and compact hand-held work lights all the way up to ultra bright flood lighting. SP is constantly pushing the boundaries of LED and battery technology to bring you cutting edge work lights that will ensure you always have the most reliable, best performing tools on the market. Longer run time, brighter lighting and innovative design is at the core of the SP cordless lighting range.

WIRELESS CHARGE LIGHTING

One of SP's latest innovative breakthroughs is the incorporation of new wireless charging technology into the work light platform.

No longer do you have to plug your work light into a charger over night. The new pad style charger allows you to simply place the work light on the charging pad and the charging process instantly begins. Magnetic zones on the front of the charging pads firmly hold the work lights in place at any angle, while the heavy duty rear magnets allow for the charging pad to be instantly mounted onto any magnetic surface such as a steel tool box or work top.

The chargers are not only compatible with SP work lights but also the latest Android & iPhones, Apple Watches, AirPods, tablets and more.

SP MAX LITHIUM BATTERIES

The SP Max Drive cordless range is powered by next-gen INR chemistry battery cells. The INR chemistry combines the safety and low resistance of Manganese and the high energy capacity of Nickel. When we combine these cells with Max Core electronics, the result is a battery pack with superior performance and safety or in simple terms, the very best available.

MAX LITHIUM

12v

COMPACT, LIGHTWEIGHT & POWERFUL

This range is widely used in the automotive industries where size is important due to inaccessibility on today's vehicles and machinery. As most of the jobs are not repetitious, usually one battery will last the whole workday, so many of SP MAX DRIVE's 12V models are available with one or two batteries.
